SAMPLE ANSWER • BAND 8

| | |
|---|---|
| **I • Intro (who)** | I'd like to talk about my aunt Gulnora, my mother's younger sister, who is probably the most hardworking person I know. She runs a small family bakery in Samarkand, and she has been doing it for almost twenty years. |
| **P • What she does** | As for her job, she bakes traditional non, those round loaves that Uzbek families eat with every meal. She wakes up at four every morning, lights the tandoor and starts kneading dough long before the city wakes up. By seven, the first customers are already queuing outside. |
| **P • How hard she works** | When it comes to effort, she truly works like a Trojan. She puts in about twelve hours a day, six days a week, and she has hardly ever taken a proper holiday. Not only does she bake, but she also manages the accounts and trains younger staff. On top of that, she still finds time to cook for relatives at the weekend. |
| **E • Reason 1** | The first reason I admire her is that she leads by example. She never asks her employees to do anything she wouldn't do herself, and so everyone around her goes the extra mile. Having seen her work this way since childhood, I have developed a much stronger work ethic. |
| **E • Reason 2** | The second reason is that her hard work has really paid off. She started with a single oven, and now she has three branches and a loyal customer base. What impresses me most is that she has never become arrogant. She still gives free bread to elderly neighbours who cannot afford it. |
| **W • Wrap-up** | So, all in all, my aunt has shown me that success comes from consistency, not luck. If it weren't for her example, I would probably give up much sooner whenever things got tough. I hope that one day I can reap the rewards of my own efforts the way she has. |
