One plan for every “technology” card

- A piece of technology you use daily
- A gadget you would like to own
- A device you gave or received as a gift
- An app that makes your life easier
- A time when technology failed you
- An electronic device you bought recently
- A piece of technology that is useful for study
- An invention that changed the world

What the technology is → **How** you use it → **How long** you have had it → **Why** it is useful

HOW TO READ EACH CARD

Tarjima + definition — o‘zbekcha ma’nosi va oddiy inglizcha izohi.

Band 8 story — iborani ro‘yxat emas, mini hikoya ichida ishlatish namunasi.

≈ Yaqin iboralar — shu ma’noga yaqin yana 2 ta natural ibora.

SAMPLE CUE CARD

Describe a piece of technology you use daily.

Describe a piece of technology you use daily.

You should say:

- what it is
- how you use it
- how long you have had it
- why it is useful

My 1-minute notes

- laptop • slim • silver • sleek design
- emails • online classes • essays • videos
- 3 years • since university • saved up
- saves time • at my fingertips • own pace
- boosts productivity • never lets me down
- downside: hooked on social media • set limits

SAMPLE ANSWER • BAND 8

I • Intro (what)	I'd like to talk about my laptop, which is an indispensable tool for my studies and my work. It's a slim silver model with a sleek design, and honestly I can't imagine a day without it.
P • How I use it	I use it from morning till night. In the morning I check my emails and plan my day, then I attend online classes, write essays and edit videos for my small YouTube channel. In the evenings I usually unwind with a film or video-call my brother in Germany, so we stay connected.
P • How long I've had it	I've had it for about three years, since I started university. It was a big expense at the time, but I saved up for months and I don't regret it. Despite being used heavily, it still runs smoothly and the battery lasts nearly ten hours.
E • Reason 1	The first reason it's so useful is that it saves me a lot of time. Everything I need is at my fingertips: documents, dictionaries, even online courses where I can learn at my own pace. What I love most about it is that it never lets me down.
E • Reason 2	Secondly, it boosts my productivity. Had I not bought it, I would still be queuing at the library for hours. The more I use it, the more shortcuts I discover that make my work smoother.
W • Wrap-up	So, all in all, my laptop is much more than a gadget; it's like a personal assistant. The only downside is that I sometimes get hooked on social media when I should be working. It's high time I set some limits, but I'd rather deal with that problem than live without it.
