SAMPLE CUE CARD

Describe a useful app.

Describe a useful app.

You should say:

- what it is
- how you found it
- how you use it
- why it is useful

My 1-minute notes

- navigation app • Tashkent • bus, metro, taxi
- word of mouth • classmate • installed same day
- real-time updates • compare routes • offline mode
- saves time • never late • fewer waits
- new places • old-town chaikhana • weekend meetups
- user-friendly • can't imagine life without it

SAMPLE ANSWER • BAND 8

I • Intro (what)	I'd like to talk about a navigation app that I use almost every day to get around Tashkent. It shows maps, bus and metro routes and even tells you how long a taxi will take, so it's a real handy tool for anyone living in a busy city.
P • How I found it	I came across it two years ago, by word of mouth. A classmate saw me struggling to find a new tutoring centre and said, 'Just download this.' Having installed it, I was amazed, because it gave me three different routes in seconds, and I got the hang of it within a day.
P • How I use it	These days I open it every morning before leaving home. I check the real-time updates to see whether the bus is delayed, then compare it with the metro to pick the faster option. It even has an offline mode, which is a lifesaver when the signal disappears underground.
E • Reason 1	The first reason it's so useful is that it saves time. The more I rely on it, the less I stand around at bus stops guessing, and I've stopped being late for classes, which used to be my biggest problem.
E • Reason 2	On top of that, it takes the hassle out of exploring new places. Were it not for this app, I would never have found the little chaikhana near the old town where I now meet friends every Saturday.
W • Wrap-up	So, all in all, it's a user-friendly tool that I can't imagine life without. It's nothing flashy, but it quietly makes my day run smoothly, and that's exactly what a good app should do.
